

Coolworld

RENTAL OF TEMPERATURE CONTROL

Temporary refrigerated storage solutions, ready fast

How we work

Contact & assessment

We listen to your needs and assess your situation on site.

Tailor-made proposal

Based on your requirements, we propose the right cooling or heating solution.

Installation & instruction

We deliver, install and test everything, and explain how to operate it, so you can start immediately.

Service & support

Our service team is available 24/7. Questions or issues? One call is enough.

Complete solutions. No half measures.

Coolworld safeguards your business continuity, with the right temperature at the right time.

Rental reasons

Why is rental your ideal solution?

- Emergency / breakdown
- Maintenance & replacement
- Temporary capacity / peak demand
- Projects & temporary installations
- Testing, commissioning & flexibility

Why does renting make sense?

- No major investment (avoid Capex)
- Flexible scaling up and down
- Temporary or project-based deployment
- Quickly deployable, including service
- Access to modern technology

With rental, you stay flexible and are assured of reliable climate-controlled continuity. Always supported with personal advice and 24/7 service.

What is included?

You benefit from scalable capacity that can be adjusted to your exact requirements.

We deliver a complete turn-key solution, fully installed and including all necessary peripherals.

If desired, Remote Monitoring can be added as an optional service for extra insight and peace of mind.

Refrigerated & combined cold storage

Combined container coldstores

Large cold storage solutions created by combining multiple containers into one temperature-controlled space. Available as 2-in-1, 3-in-1 or larger configurations, using 20ft and 40ft containers.

A flexible solution for larger storage capacity

Designed for businesses that need more refrigerated space while keeping the benefits of modular container systems. These units offer reliable temperature control, safe access and a hygienic interior, making them suitable for a wide range of storage and operational needs.

Specifications

- Modular design using 20ft and 40ft containers
- Available in 2-in-1 up to any size required.
- Corrosion-resistant corten steel exterior
- Hygienic interior with non-slip aluminium floor
- Clear PVC curtains at door openings
- Internal LED lighting with emergency back-up
- Safe door system with one-handed operation and secure internal access

Optional extras

Heavy-duty steel ramp, high/low temperature alarm, sample port, anti-tamper covers, noise reduction, plastic shelving, insulated curtains and adjustable platform for 40ft units.

Applications

Ideal for large-scale cold storage, food logistics, pharmaceutical storage, industrial operations and other temperature-sensitive environments.

Cold storage

Cold storage containers

High-spec cold storage containers, engineered for reliable temperature control and secure storage. Available in 10ft, 20ft and 40ft sizes, suitable for a wide range of industrial and logistics applications.

A practical solution for temperature-sensitive storage

Designed for durability, safety and ease of use. The container features an insulated door with one-handed operation, pressure equalisation for easy opening, anti-freeze heating in the door and frame, and secure locking with safe internal access. A door switch shuts off the cooling unit when opened, helping to reduce ice build-up and energy use.

Specification

- Temperature range from -40°C to $+45^{\circ}\text{C}$
- Cooling capacity: 17 kW
- Available in 10ft, 20ft and 40ft
- Corrosion-resistant corten steel exterior
- Hygienic interior with non-slip aluminium floor
- Internal LED lighting with emergency back-up

Optional extras

Heavy-duty steel ramp, high/low temperature alarm, sample port, anti-tamper covers, noise reduction, plastic shelving, insulated curtains and adjustable platform for 40ft units.

Applications

Ideal for cold chain storage, food logistics, pharmaceuticals, industrial processes and other temperature-critical environments.

Trusted when it matters most

Cold storage capacity within 24 hours

"The new unit allowed us to be able to hold more stock on our premises and not have to use external cold stores. Saving time and money.

Coolworld were very professional from start to finish and helpful throughout! Everything went great, and I wouldn't hesitate to use them again.

10 out of 10, never an issue!"

Patrick Kennedy
Owner PK Wholesalers

Extra capacity, on time

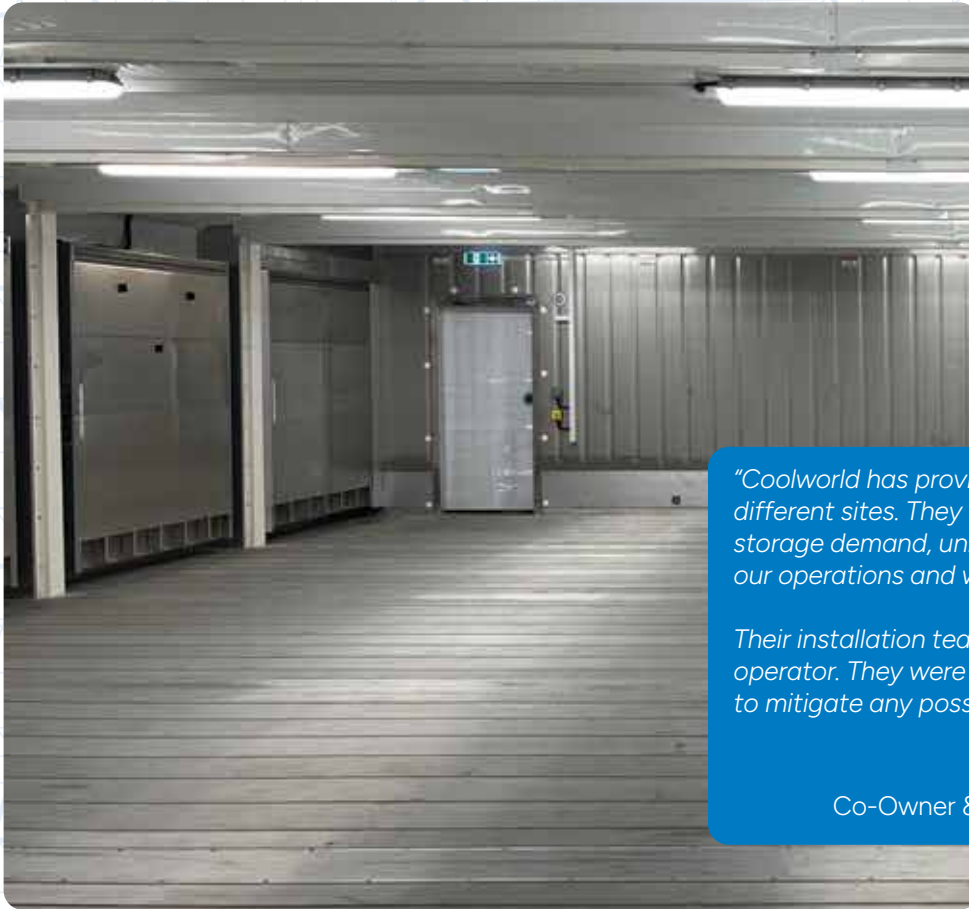

"The containers have played a vital role, becoming an extension to both our chilled and frozen storage capabilities on-site.

The relationship with Coolworld is both informal and professional; everything we've asked for has happened on time and in full.

Just keep doing what you are currently doing!"

John Devenney
Operations Director Summit Foods

Trusted when it matters most

Storage
without disruption

SYNERGIX
LOGISTICS SOLUTIONS

"Coolworld has provided Synergix with multiple units at different sites. They were able to find a solution for every storage demand, unit and site size, with no disruption to our operations and within very tight time frames.

Their installation team was amazing, as well as the crane operator. They were very knowledgeable, quick, and able to mitigate any possible obstacle at the site!"

Anthony Champness
Co-Owner & Director, Synergix Logistics Solutions

Growth through greater capacity

"The installation of Coolworld Mega units has allowed our business to grow substantially, enhancing productivity and reducing operational costs.

Since our initial involvement with Coolworld in 2016, we have built up a great relationship with Michael and the Coolworld team.

Their responsiveness, proactive communication and outstanding service are invaluable to us."

Kevin Talty
Operations Manager, BWG Ennis

About Coolworld

Coolworld Rentals is the specialist in temporary cooling and heating solutions for industry, construction, logistics, food, and chemicals. With over 30 years of experience, a modern energy-efficient rental fleet, and a 24/7 service department, we ensure your processes continue without interruption, no matter what.

From HACCP-compliant cold storage units to powerful industrial chillers, low NOx boilers and climate control for critical production environments: we always deliver the right solution. Full turnkey, including transport, installation, maintenance, and monitoring.

With offices and service points in the Netherlands, Belgium, Germany, France, Austria, Switzerland, Ireland and UK we are always nearby and ready to act. Our mission? To completely unburden you, providing you with the right temperature at the right moment.

Why choose Coolworld?

- ✓ Full-service rental model: from advice to maintenance
- ✓ Fast availability in emergencies or scheduled downtime
- ✓ Energy-efficient and sustainable: ISO 9001, 14001, and 45001
- ✓ Flexible contracts tailored to your process
- ✓ Expertise in chemicals, food, pharma and industry

At Coolworld, we believe in decisiveness, humanity, and innovation. No challenge is too big. Your business continuity is our top priority. Request a free QuickScan and receive a tailored cooling plan within 24 hours.
